Welcome to the annual Charter High School for Architecture and Design Champagne Breakfast. This impressive event demonstrates that CHAD has unprecedented support from so many people and organizations in the Construction, Architecture and Design communities. Working with many of our supporters we continue to create unique programs and opportunities for CHAD students.

CHAD began as the Legacy Project at the national AIA convention in Philadelphia in 1999. All of our students enjoy Design classes beginning their first day of school in 9th grade leading to “majors” in Architecture, Industrial Design, Fashion Design and Graphic Design.

CHAD boasts a graduation rate of 90% and the vast majority of our students go on to four year colleges, many of them as Design majors. We remain committed to our mission of providing a Design infused curriculum to urban students and to growing the number of minorities in the various fields of Architecture, Engineering and Design.

The CHAD Business Advisory Committee is committed to raising much needed funds for our continued success. Urban public education, and especially charter schools, are receiving less money each year.

The success of our Breakfast is a testament to the Business Advisory Committee, and to all of our supporters present here today. Your generosity is reflected not only by your financial support, but also by your willingness to get involved in partnership with us to provide these opportunities for our students. On behalf of our students, our families and our staff, I thank you all for your commitment to CHAD and to building a better Philadelphia.

Marguerite Anglin, AIA  
CHAD Board President

Anne Papageorge is the Vice President for Facilities and Real Estate Services at the University of Pennsylvania. Anne joined the University in October 2006 and has responsibility for Planning, Design and Construction; Facilities Operations, Maintenance, and Utilities; and Real Estate Operations and Development. She oversees a department of approximately 975 staff, $170M in operating expenses and a capital budget averaging approximately $275M per year, the Penn Connects campus development plan, and the Environmental Sustainability Advisory Committee responsible for developing and implementing the Climate Action Plan for the university.

Anne is a licensed landscape architect and was previously the Senior Vice President and Memorial Design Director for the Lower Manhattan Development Corp., managing the planning, design and construction of the nearly $1 billion project encompassing the World Trade Center Memorial, Memorial Museum, Visitor’s Center and related facilities.

Prior to joining the LMDC in 2004, she worked in design and construction for the City of New York, where she served as first deputy commissioner of the Department of Design and Construction, managing a staff of 1,200 and overseeing 750 projects valued at $4.4 billion.

Anne holds a bachelor’s degree in landscape architecture from the State University of New York College of Environmental Science and Forestry School of Landscape Architecture and an M.B.A. from the City University of New York Baruch College. She serves on the executive boards of the Morris Arboretum of the University of Pennsylvania, Schuylkill River Development Corporation, the Philadelphia Center for Architecture and serves on the committees of the University City Science Center and Longwood Gardens; she also serves on the American Heart Association’s Go Red for Women Executive Leadership Team.

Billie Tsien was born in Ithaca, NY and received her undergraduate degree in Fine Arts from Yale University and her Master of Architecture degree from UCLA. In 1986 she and Tod Williams founded their New York based architecture firm Tod Williams Billie Tsien Architects | Partners.

Located in New York City, their studio focuses on work for institutions including schools, museums, and not-for-profits—organizations and people who value issues of aspiration and meaning, timelessness and beauty. Notable projects include The Barnes Foundation in Philadelphia, Lefrak Center at Lakeside in Prospect Park, Brooklyn, and the Asia Society Center in Hong Kong. They are currently designing The Obama Presidential Center in Chicago. Over the past three decades, they have received numerous national and international citations, including the 2013 National Medal of the Arts from President Obama.

Billie is deeply involved in the cultural community and maintains long-standing associations with many organizations devoted to the arts. She is currently President of the Academy of Arts and Letters, a Fellow of the American Academy in Rome, and has been inducted into the American Academy of Arts and Letters, National Academy of Design, American Academy of Arts and Sciences, and the American Philosophical Society.

In parallel with her practice Billie also maintains an active academic career and lectures worldwide. As both an educator and practitioner, she is deeply committed to making a better world through architecture.
The University of Pennsylvania would like to thank CHAD for believing that collaboration builds community, creative thinking empowers dreams, passion develops the skill to sustain excellence, and stewardship inspires responsible care of resources.
